FLYWHEEL

Flywheel creates products and resources that help designers, developers, and digital agencies do more of the work they love to do, and less of the work they don't. We make it a breeze to develop WordPress sites, handle hosting, manage projects, and ultimately scale your business.

About the company

Flywheel began as a journey to create the most delightful WordPress hosting platform in the world. Since 2012, Flywheel has grown from three founders to a three-digit team that's trusted by over 70,000 designers, developers, and agencies across the globe. Built on a backbone of beautiful UI, a stellar support experience, and rock-solid managed WordPress hosting, the company has expanded to create multiple products and resources that help creatives do their very best work. The company also offers a brilliant local development application (Local by Flywheel) and has created hundreds of pieces of WordPress and design content on Layout, a problem-solving publication.
